Summary: A graduate of Fullstack Academy, I am a Software Engineer with a passion for coding and a mindset for growth, always looking to improve my skills.

Technologies :

React - PWA - Redux - Node.js - Express - Sequelize - PostgreSQL - HTML5 - CSS3 - Socket.io - framer motion - IMDB APIs - Spotify APIs - JWT - Webpack - git

Technical Projects :

Moments: live | github

A PWA web app group project that allows users to capture or upload a photo and match it with a song.
- Authenticated users and obtained authorization to access users' data using Spotify APIs.
- Effectively used the color-thief library to extract the dominant colors in photos.
- Met all PWA criteria, resulting in the ability to install the app without the need to host it in the app store.

Pick a movie: live | github

A web application solo project that allows two or more users to pick and match their favorite movies.
- Successfully established a real-time connection using socket.io.
- Deployed and styled different aspects of the website.
- Utilized a modern user-friendly interface using multiple advanced tools and APIs such as Framer Motion and IMDb APIs.

Objectively Better Books: live | github

An eCommerce group project selling books that offer different functionality for users and guests.
- Effectively Used express routes to communicate with the front end.
- Used JSON Web Tokens to store encrypted user information.
- Utilized React to build components to render them on a webpage and utilized Redux for state management.

Experience :

CVS Caremark, Scottsdale, AZ   **09/2017 - 11/2021** *Clinical Operations Consultant*
- Provided Periodic functionality evaluation of internal software applications that are used by clinical operation agents to deliver better business solutions.
- Provided coaching and mentoring to newly hired colleagues in the clinical operation department.
- Assisted with developing the clinical operations employer manual, including training guidelines.
- Assisted in testing internal programs, releases, and updates to ensure the effectiveness of newly added tools and features.

Education :

Fullstack Academy - New York, NY   **Feb 2022 Certificate, Software Engineering**
(17-Week Full Stack Immersive)

Amazon Web Services Training and Certification   **Mar 2022 Certificate, AWS Certified Cloud Practitioner**
